Chapter President — Nick VonMyhr

January 2026 ASPE – Kicking Off the New Year

As we kick off 2026, I hope everyone had a wonderful holiday season and was able to enjoy some well-deserved time with family and friends. As we step into the new year, I want to wish everyone a happy, healthy, and successful year ahead.

Before looking forward, I'd like to take a moment to thank last month's Christmas event speakers, **Tom Van Egmond** and **Dustin Garner**, for an excellent presentation titled Engineering Trends in Above-Ground Valve Installations. Their presentation was informative, engaging, and highly relevant to our day-to-day work as plumbing professionals. It did a wonderful job highlighting current design flaws while also providing elegant solutions using available market products. We truly appreciate them sharing their time, experience, and technical insight with our chapter.

I'd also like to celebrate the tremendous success of our 2025 Toys for Tots fundraiser. Thanks to the generosity and enthusiasm of our ASPE community, we made a meaningful impact this holiday season. The level of participation and support was outstanding, and it's something our chapter should be incredibly proud of. Events like this highlight not only the technical strength of our organization, but also the heart behind it.

Looking ahead, I'm excited to introduce our first speaker of 2026, Rich Lussier of Toto. Rich will be presenting on Effective Restroom Design, a topic that continues to be critically important as building codes evolve and expectations around functionality, accessibility, durability, and occupant well-being continue to rise.

Presentation Overview:

Join us this month to discuss restroom design, presented by Rich Lussier. By the end of

Chapter President — Nick VonMyhr (continued)

this meeting, attendees will be able to:

1. Identify how restrooms in your buildings truly impact occupants and your legacy as a designer
2. Review the 2010 ADA Standards for Accessible Design for restrooms and understand their implementation
3. Distinguish between minimal accessible design and universal design
4. Define the characteristics of TOTAL design as they apply to the restroom setting
5. Discuss the WELL Certification Program and how to meet criteria for WELL credits to support healthier restrooms

We're looking forward to starting the year strong with an informative and engaging presentation, and we hope to see everyone there. Thank you all for your continued involvement, support, and commitment to making our ASPE chapter such a great community.

Here's to a great start to 2026!

ARMSTRONG 

 **Intellihot**

HYDRONIC SOLUTIONS THAT DELIVER HEDRICK ASSOCIATES HIGHLIGHTS ARMSTRONG & INTELLIHOT

At Hedrick Associates, we're proud to represent industry-leading manufacturers that are redefining performance, efficiency, and innovation in plumbing system design. In this issue, we're excited to spotlight two product lines that are making serious waves in commercial water system applications: Armstrong's Plumbing Booster Pump Skids and Intellihot's On-Demand Water Heaters.

The Smarter Way to Heat Water

Say goodbye to storage tanks. Intellihot's commercial tankless water heaters are revolutionizing how buildings deliver hot water – with reliability, redundancy, and rapid response. These systems are ideal for restaurants, hotels, multi-unit residential, healthcare, and more.

With capacities ranging from compact units to high-volume models like the iQ Series, Intellihot delivers scalable, energy-efficient water heating solutions that meet today's demanding plumbing codes and performance expectations.

- On-demand performance
- No storage tanks
- Space-saving design
- Smart diagnostics

- Fully customizable
- Integrated controls
- Compact footprint
- Easy install and service

Smarter Pressure Solutions

Armstrong's factory-assembled and tested plumbing booster pump skids provide unmatched reliability and efficiency for domestic water pressure applications in commercial and institutional buildings.

Whether you're supplying a multi-story office building, hospital, or school, Armstrong booster skids provide a seamless, turnkey solution that performs under pressure – literally.

Here to Support Your Next Project!

As your local manufacturer's rep, Hedrick Associates offers more than just top-tier equipment – we're your design resource and support partner from concept to commissioning. Whether you're specifying a domestic water system for new construction or upgrading aging infrastructure, we're here to help you find the right solutions.

Let's connect – reach out to your Hedrick Associates rep to schedule a product demo, request a spec review, or learn more about these innovative systems.

Delivering smart solutions in HVAC, plumbing, and critical systems across Michigan.

Engineered for safer, smarter hot water

THE BRAIN® delivers precise temperature control and intelligent safety for institutional plumbing systems

Protect your people and control your water with THE BRAIN®—precision temperature, built-in safety, and smart monitoring in one powerful solution.

Fast, flexible installation

Four configurations to fit your system layout and save time.

Built-in safety features

Reduce Legionella risk with thermal disinfection and real-time alerts.

Precision temperature control

Maintain stable, accurate water temperatures for safety and comfort.

Smart monitoring

Track system performance with programmable controls and diagnostics.

Upgrade your hot water system today! Discover how THE BRAIN can make your system safer.

The Best In Balancing

Now Backed By An Unmatched 10-Year Promise.

CircuitSolver thermostatic balancing valves automatically balance hot water recirculation systems. They ensure hot water availability and now come with an industry-leading **10-year warranty.**

Completely Tamper-Proof

Never worry about unnecessary adjustments by unqualified personnel, resulting in an unbalanced hot water system.

Configurations For All Applications

The Standard CircuitSolver® valve is available in six sizes from 1/2" to 2". All of our valves and assemblies are available with various end connections.

VP Membership—John Cassady

Hello ASPE Members,

We are currently at 99 members in the West Michigan chapter.

For those of you who have a membership expiring by the end of February, you should have received an email reminder from the national society already. I will send out follow-up reminders to you all as well.

Many of you have memberships that expire or renew at the end of the calendar year. Please make sure your membership is up to date so you do not miss anything.

When you are renewing your membership, please be sure to select West Michigan as your “home chapter”. Any “at large” members may miss out on communication from the chapter.

You can also update your chapter affiliation by logging in to ASPE.org, following My Account > My Profile, and editing your information.

If you have a coworker interested in joining our chapter, please have them contact me with questions about membership.

FIGHTING CORROSION & BACTERIA LIKE NO OTHER

Only Bradford White features exclusive Vitraglas® tank lining with Microban®:

- Vitraglas® provides unsurpassed protection from the corrosive effects of water.
- Microban® antimicrobial product protection helps prevent the growth of bacteria, mold and mildew on the surface of the tank lining.

**Vitraglas® and Microban® offer
product protection and peace of mind
around-the-clock.**

West Michigan is the proud home of Bradford White Water Heaters.

Microban® antimicrobial product protection helps prevent the growth of bacteria, mold and mildew that may affect the product. The built-in antimicrobial properties do not protect users or others from disease-causing organisms. Microban® is a registered trademark of Microban Products Company. ©2023, Bradford White Corporation. All rights reserved. BAHBA0123

Is Your Municipal (City) Water Safe to Drink?

If so, why does it look & taste so bad???

As with everything these days, city water is becoming more expensive per gallon. Some are wondering about its quality as well. Is the quality improving, or staying stagnant?

City water pipes - before and after.

Many times, it tastes terrible due to the Chlorine or Chloramines added to the water as a disinfectant... **are these disinfectants safe to drink?**

Should Fluoride be added anymore? It is good for your teeth, but how about the rest of your body?

If my city water is healthy, then why does it look discolored at certain times of the year?

If my water is safe to drink, then why are there so many 'Boiled Water Advisories'?

If you want to simply clean up the objectionable taste of city water for drinking, you can install carbon filtration which removes the Chlorine and organics, and can also remove PFOs (Perfluorooctane Sulfonate), should it be necessary.

All city drinking water has to pass primary and secondary drinking water regulations mandated by the state and federal governments.

But is it safe to drink?

Whether you're on a well, or city water, Flier's recommends that customers install a Reverse Osmosis system to feed a point of use faucet at the kitchen sink at home or in the office, and to feed your chilled water dispenser and ice maker in your refrigerator. This will cover 98% of your drinking water.

Undersink Reverse Osmosis Unit

Example of discolored city water.

Why not be sure? Why worry about 'Boiled Water Advisories'? Why worry about possible bacterial contamination or toxic metals. Rather, rest easy knowing that 99% of all solids and contaminants are removed with Reverse Osmosis.

Flier's can advise you on the proper Undersink Reverse Osmosis system.

VP Legislative — Ryan Groves

ASSE International is forming a working group to develop a proposed new professional qualification standard, ASSE 18000, focused on minimum competency requirements for fuel gas systems and equipment installers and repairers. The standard will address work involving natural gas piping in residential, light commercial, and light industrial applications, with the goal of improving safety, reducing hazards, and promoting consistent, high-quality workmanship. ASSE invites participation from installers, inspectors, trainers, utilities, manufacturers, regulators, and other industry stakeholders.

Applications to join the working group are due March 1. The first meeting will be held in person at the ASSE Mid-Year Meeting in St. Louis on April 15, with future meetings conducted virtually.

Are you considering joining ASPE?

Well, you should! Because it's hugely beneficial.

1. Professional Development & Education

- **Technical resources:** Access to design guides, handbooks, and standards like the Plumbing Engineering Design Handbook Series, which are industry staples.
 - **Training & webinars:** Regular seminars, technical webinars, and certification courses to help you grow your skills (e.g., CPD – Certified in Plumbing Design).
 - **Continuing education credits:** Easily earn CEUs and PDHs to maintain professional licensure.
-

2. Networking & Mentorship

- **Local chapters:** ASPE has local chapters nationwide that host technical meetings, site tours, and social events—perfect for meeting experienced engineers, designers, and manufacturers.
 - **Mentorship:** Many chapters pair younger engineers with senior professionals who can guide you through design challenges and career development.
 - **Peer community:** You'll gain a professional network of engineers who share your challenges and can help with practical design advice.
-

3. Career Growth Opportunities

- **Recognition:** ASPE membership adds credibility to your résumé and signals commitment to professional excellence.
- **Job board & career center:** Exclusive access to plumbing and mechanical design positions.
- **Leadership opportunities:** Joining committees or serving as a chapter officer develops management and communication skills early in your career.
