### March 2022

## WESTERN MICHIGAN

**This months Meeting info:** Lunch Meeting Information: Dinner Meeting Information:

**Date:**  
**March 10th**

**Location:**  
**Park Club of Kalamazoo  
219 W. South Street  
Kalamazoo , MI 49007**

**Location:**  
**Stone Water Country Club  
7177 Kalamazoo Ave SE  
Caledonia, MI 49316**

**Speaker:**  
**Mark Stone  
EMGS**

**Time:**  
**Noon to 1PM**

**Time:**  
**5:30 PM followed by dinner**

**Subject:**  
**Medical Gas Systems**

**Cost:**  
**\$25 per person**

**Cost:**  
**\$30 per person**

## Important Information!

**Spring is almost here, and so is the annual ASPE Golf Outing. Look for registration information in the coming weeks.**

# TAGGART-KNIGHT

Commercial Plumbing Manufacturers' Representative

Stainless steel pipe, fittings, Trench drains, Floor Drains, Cleanouts.

Behavioral Health, Manual and Sensor Faucets. Shower Systems. \*\*

Electric Tankless & Mini-Tank Water Heaters. \*\*

Stainless Steel Counter Sinks, Hand Sinks, Scullery Sinks.

AXION Emergency Equipment, Bottle Fillers, Drinking Fountains, Water Coolers

Traditional & Solid Surface Washfountains, Solid Surface Countertops and Lavatory Systems.

Bronze & Stainless Steel Solenoid Valves. \*\*

Polypropylene & PVDF Acid Waste & High Purity Piping Systems. Acid Neutralization Tanks. \*\*

Digital & Traditional Thermostatic Mixing Valve Systems. \*\*

Welded Heavy Gauge Steel & Stainless Steel Interceptors & Separators. PDI Certified.

Cast Iron Drains & Carriers. Pressure Actuated Automatic Control Valves (ACV).

\*\* Inventoried by Taggart-Knight

## Chapter President—Tom Kingshott

I hope that everyone had a chance to enjoy the taste of Spring that we enjoyed last Saturday!! It's great to be in person for our technical meetings, and we have another great one this week with mark Stone from EMGS presenting.

Be sure to look at the upcoming newsletter and the website for information on our ASPE golf outing in may.

---

## VP Technical — Chuck Shoudel

Wow, what an awesome weekend of weather. Spring is definitely around the corner. The month we have the privilege of hosting Mark Stone with EMGS to discuss Medical Gas Systems.

If you are new to ASPE and attend meeting and would like a CEU certificate, Please follow the link and request a PID number, We need this number to issue the certificate.

### [Request an Online Account - ASPE](#)

After you receive your number by ASPE, please email Nick VonMyhr or Chuck Shoudel the number so certificates can be issued,

Nick Von Myhr [nickv@gmb.com](mailto:nickv@gmb.com)

Chuck Shoudel [chuck.shoudel@byce.com](mailto:chuck.shoudel@byce.com)

I look forward to seeing everyone Thursday!

## VP Legislative —Bryan Peceny

This past month we have Samantha Hoch, Regional Sales Director for Haws present on emergency showers and eyewashes. At its core we use these emergency fixtures to protect against various accidents that involve chemicals, acids, and other fluids that will have bad reactions with skin and eyes.

If you think you might need an eye, face, or full shower emergency fixture your best resource is ANSI/ISEA Z358.1. Like most standards you'll need to buy the actual standard. If you don't wish to purchase, I'd recommend one of the main providers of these fixtures. Most have wonderful information and guidelines with much of the ANSI standard available on their website.

Samantha did a wonder job explaining the primary safety fixtures, eye wash, eye & face wash and emergency shower and combination face wash and shower. You'll find when it comes to showers, you'll most likely need a combination unit. Basically, there is too much pressure and indirect spray from the shower to properly clean your eyes. Also, when looking at eye washes, check with your client to determine if a combination face and eye will work best (most likely). One items she recommend that I have not always heard stressed was pressure/flow control. She showed pictures of a face wash that was shooting across the room. So, you might have the choice of burning eyes or blasting your eye with water pressure.

After you determine you need a fixture, which will be based on hazard and hopefully direction from your client, you need to determine where to place these. Here you can use my favorite rule, 10 second travel distance. OK, if my skin was burning from acid most likely I can cover a lot of distance in 10 seconds, but you can't assume that. 55 feet is a recognized standard. But don't place is adjacent rooms if there are doors between them. Next concern is hot water. We don't want hot, we don't want cold, we want tepid. From the

## VP Legislative —Bryan Peceny (Continued)

ANSI standard that will be between 60 degrees and 100 degrees. Personally, I like to target 80-degree F. When you select an emergency shower, I then strongly recommend you use their emergency thermostatic mixing valve. These should be ANSI Z358.1 and ASSE-1071. Don't expect to use a standard ASSE 1070. With hot water, one major concern is volume of hot water. A shower and face wash will require 23 GPM over at least 15 minutes. That's a lot of flow and/or storage. Make sure you have the available capacity.

Like most plumbing issues where you might not be selecting often, your local manufacturer reps will be more than happy to lend a hand.

---

## VP Membership — John Cassady

We are currently at 73 members in our chapter. Please join me in welcoming our newest member, Julia Sicoli with TowerPinkster. For those of you that have a membership expiring by the end of April, you should have received an email reminder from the national society already. I will send out follow-up reminders to you all this week as well.

If you have a coworker that is interested in joining our chapter, please have them reach out to me for membership.

**FLIER'S**  
QUALITY WATER SYSTEMS

## CUSTOM DESIGNED AND ENGINEERED WATER PURIFICATION SYSTEMS

Flier's Quality Water Systems is here to help. We offer complete water filtration/purification system designs for engineers and architects. Flier's custom engineers purification systems specific to the required water quality needed for each project.

Commercial water purification systems can pose countless challenges without having the knowledge and experience of a water purification professional. As the above diagram shows, there can be a few or there can be many components needed to achieve the exact water quality required to achieve the exact water quality required. A member of our experienced engineering staff will supply a system design, equipment sizing, and equipment sourcing along with P&ID drawings for your particular project.

We custom design complete purification systems to fit the scope of any project. No matter the size or specification, we're here to meet the needs of plumbing engineers and architects. Let us help you.

**"When we do a job, we do it right. Any other way is inexcusable."**

# ARMSTRONG INTRODUCES THE RADA DIGITAL FAUCET

**A SUPERIOR LEVEL OF HANDWASHING SAFETY AND INFECTION CONTROL,  
FROM THE WORLD LEADER IN DIGITAL WATER TEMPERATURE TECHNOLOGY.**

Armstrong brings the unparalleled accuracy, stability and safety of The Brain® Digital Recirculation Valve to a point-of-use solution—engineered to mitigate the growth and spread of waterborne pathogens and minimize the risk of scalding injury.

Rada Digital Faucets are an essential component of Armada<sup>SM</sup>—a total, state-of-the-art hot water system engineered to deliver a superior level of user safety, infection control and compliance, from mechanical room to the point of use.

Please contact Merlo Energy at 1-800-968-1195

## **AYP Liaison — Luciana Kayo**

Greetings everyone!

This month I would like to highlight an on-demand online program offered by ASPE for those who are new in the industry. This Introduction to Plumbing Products is a series of five courses developed by the American Supply Association's (ASA-U). While learning, you also earn 14.75 hours of continuing education credits that can be applied towards certifications and licenses.

The courses are as follows:

1. Fixtures and faucets (2.75 hours)
2. Introduction to Copper Tube, Plastic Pipe, and Fittings (4 hours)
3. Introduction to Pipes, Valves, and Fittings (3 hours)
4. Introduction to Steel, Stainless Steel, Iron Pipe and Fittings (3 hours)
5. Sump, Sewage, and Effluent Pumps (2 hours).

The courses are available for members and non-members and can be purchased separately or the bundle at a discounted price. This is perfect for those who are planning to take the CPDT exam or need to brush up for the CPD exam.

To find out more about each course and register, visit the link below.

<https://education.aspe.org/products/introduction-to-plumbing-products-bundle>

Once registered, you will have access to the content and it will never expire. If any questions about this program, you can directly contact [education@aspe.org](mailto:education@aspe.org).

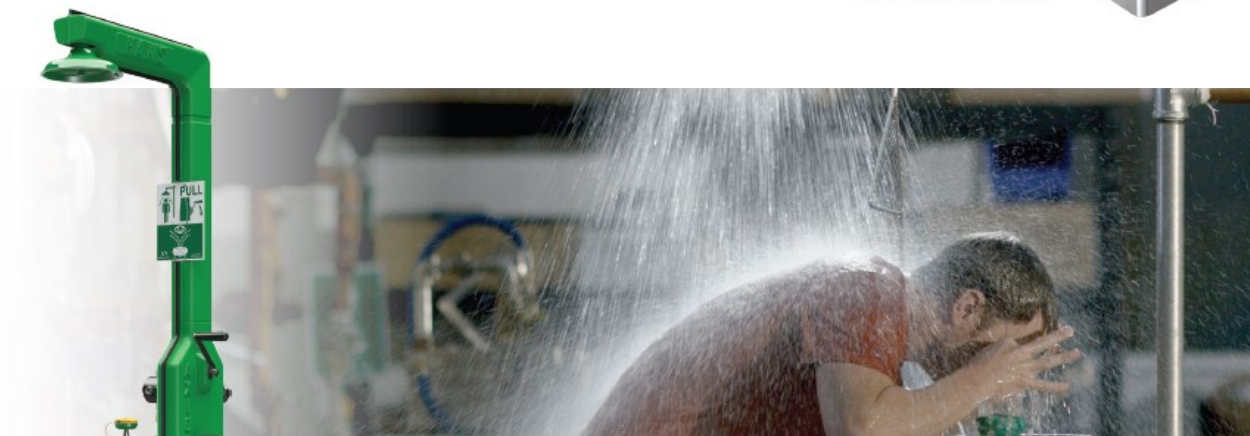

# SAFETY OR HYDRATION – HAWS® IS THERE FOR YOU

Haws offers a wide variety of motion-activated hydration options for sanitary use in public places.

With an optional bubbler head deactivation feature, easily maneuver between functional and non-functional use at your convenience to meet building ADA compliance requirements.
